

Practical :- 6

Aim:- Write a program that prompts the user to enter a letter and check whether a letter is a vowel or constant.

Program :-

```
import java.util.*;
class Exp_6
{
    public static void main(String[] args)
    {
        Scanner in = new Scanner(System.in);
        char c;
        System.out.println("Enter Character: ");
        c = in.next().charAt(0);

        switch(c)
        {
            case 'a':
            case 'e':
            case 'i':
            case 'o':
            case 'u':
            case 'A':
            case 'E':
            case 'I':
            case 'O':
            case 'U':
                System.out.println("The Character " + c + " is Vowel");
                break;
            default:
                System.out.println("The Character " + c + " is Constant");
                break;
        }
    }
}
```

Output :-

```
D:\pr-18>java Exp_6
Enter Character:
V
The Character V is Constant
```
