

Practical :- 7

Aim:- Assume a vehicle plate number consists of three uppercase letters followed by four digits. Write a program to generate a plate number.

Program :-

```
import java.util.*;

public class Exp_7 {
    public static String gpn() {
        Random rnd = new Random();
        StringBuilder pn = new StringBuilder();

        for (int i = 0; i < 3; i++) {
            char letter = (char) ('A' + rnd.nextInt(26));
            pn.append(letter);
        }

        for (int i = 0; i < 4; i++) {
            int digit = rnd.nextInt(10);
            pn.append(digit);
        }

        return pn.toString();
    }

    public static void main(String[] args) {
        System.out.println(gpn());
    }
}
```

Output :-

```
D:\pr-18>javac Exp_7.java

D:\pr-18>java Exp_7.java
FJE1659

D:\pr-18>java Exp_7.java
ZDL4110

D:\pr-18>java Exp_7.java
LKI7354

D:\pr-18>
```
